

# Camtronics

## Electronics Made Effortless.

Your UK-based EMS for High-Reliability  
Electronics Assemblies **Since 1993**

At Camtronics, we make complex electronics manufacturing feel effortless — combining precision, openness, and reliability to keep your production moving smoothly and your projects stress-free.

- ✓ UK-based Electronics Manufacturing Services partner
- ✓ Single-site operation, ISO 9001
- ✓ Right-first-time, high-reliability electronics assemblies
- ✓ An extension of your production teams

## Electronics Assemblies for Real-World Applications

Connectivity, IoT &  
Smart Systems

Environments

# Comprehensive, End-to-End Electronics Manufacturing Services

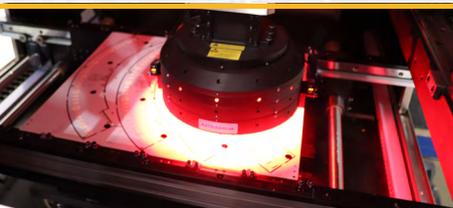

## Surface Mount Technology

Camtronics provides high-complexity SMT assembly, supporting fine-pitch components including micro-BGA, QFN and LGA. Controlled processes, automated inspection and full traceability ensure right-first-time, high-reliability assemblies.

## PTH Assembly, Coating & Box-Build

Through-hole assembly and conformal coating support the reliable manufacture of complete electronic products, while enclosure assembly and box-build deliver a full turnkey solution tailored to your exact requirements.

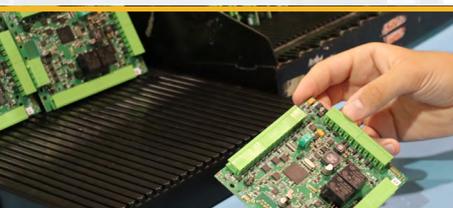

## Inspection, Programming & Test

AOI inspection and functional testing ensure assemblies meet defined quality and performance requirements. Multiple programming platforms support a wide range of devices.

## Material Management

ERP driven component sourcing and informed guidance support continuity of supply. Where appropriate, temperature controlled storage and proactive shortage mitigation help protect component integrity and maintain production schedules.

## Quality & Compliance

ISO 9001–certified processes and IPC-610 workmanship standards underpin consistent manufacturing quality. End-to-end traceability across materials and assemblies provides assurance, accountability, and audit readiness throughout the production lifecycle.

## Engineering & ECN Support

Fast, predictable ECN turnaround and practical DFM advice support controlled design change. Clear communication with engineering teams, backed by responsive technical assistance, helps manage updates without disrupting quality, schedule, or production stability.

# How We Keep Manufacturing Effortless

## Clear Communication & No-Drama Delivery

Manufacturing is effortless when communication is clear, timely and direct. No chasing, no ambiguity and no surprises.

We provide straightforward points of contact, transparent updates and early visibility of risks, so issues are addressed before they escalate and decisions are made with confidence.

By working openly and proactively, we remove friction from day-to-day interactions.

Customers are kept informed, changes are discussed early, and expectations are aligned, creating a calm, predictable manufacturing experience that feels controlled, collaborative and refreshingly drama-free.

## Capabilities that fit your design

Manufacturing is kept predictable through right-first-time builds and a technical capability that exceeds most requirements.

Our support for complex SMT assemblies and in-house box-build eliminates unnecessary transport, and makes every build straightforward and predictable.

## Our Predictable 'Right First Time' Approach

Tailored scheduling and modern manufacturing equipment deliver stable, repeatable output.

Proactive material management anticipates change, addressing component lifecycle risks and shortages early to maintain continuity of supply and minimise disruption to production schedules.

## Fast Change Control & Engineering Support

Design changes are managed without schedule shocks through fast, predictable ECN turnaround.

Practical DFM advice, responsive technical assistance, and direct communication with engineering teams ensure changes are implemented efficiently while maintaining quality and delivery commitments.

## Supply Chain Stability & Security

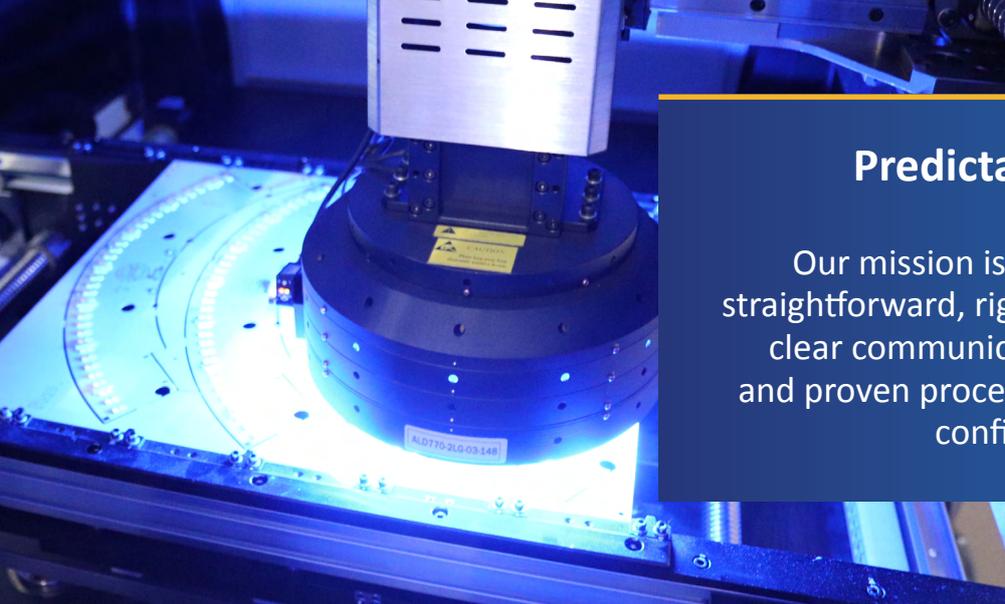

Lot-to-kit traceability, ISO 9001 quality management, and IPC-610 workmanship standards provide confidence and audit readiness.

Working as part of your value chain, we integrate with your processes, maintain clear communication, and provide flexibility without compromising control.

***“We have enjoyed an excellent commercial and technical relationship for 20 years with Camtronics.***

***They have supported us in manufacturing and in continuously developing competitive products that keep us at the forefront of the industrial industry.”***

Global Industrial Sensor & Control Company

Predictably on time... **No drama.**

Our mission is to turn complex electronics into straightforward, right-first-time assemblies through clear communication, end-to-end accountability and proven processes, so customers can plan with confidence and our people can excel.

## Make Camtronics Your **CHOICE**

### **C**ollaboration

We work with our customers, not for them

### **H**onesty

We say what we mean and do what we say

### **O**penness

We share info, feedback, and credit

### **I**ntegrity

We take pride in quality, even when no one's looking

### **C**haracter

No egos, no nonsense, no drama

### **E**mpathy

We get it, we care, and we go further to make it right

With comprehensive materials management, and full lot-to-kit traceability, we ensure right-first-time builds and predictable delivery.
